- Big Data Infrastructure, MapReduce and Cloud Computing
- Big Data visualization
- Big Data curation and management
- Big Data semantics, scientific discovery and intelligence
- Big Data performance analysis and large-scale deployment
- Security, privacy, trust, and legal issues to big data
- Big Data vs Big Business and Big Industry
- Large data stream processing on cloud
- NoSQL data stores and DB scalability
- Big Data placement, scheduling, and optimization
- Distributed file systems for Big Data
- Performance characterization, evaluation and optimization
- Volume, Velocity, Variety, Value and Veracity of Big Data
- Storage and computation management of Big Data
- Large-scale big data workflow management
- Mobility and big data
- Sensor network, social network and big data
- Data Visualization and Visual Analytics
- Big Data Algorithms, Applications and Services
- Big Data Mining and Analytics
